Technologies

I am familiar with many aspects of web development / computer science:

- HTML/CSS/Javascript
- jQuery
- Third party APIs
- C++
- Searching/Sorting/Data Structures
- Bootstrap

Here are some of my best projects made with the technologies above:

- Life Organizer - an application to allow the user to organize and keep track of their daily routines: <https://davidlindnerjr.github.io/Portfolio/>
- Weather Dashboard - an application to display a searched weather conditions for a city and the weather for the next five days:
<https://davidlindnerjr.github.io/HW06-WeatherDashboard/>
- Code Quiz - A dynamically created quiz to test the user's knowledge of coding:
<https://davidlindnerjr.github.io/HW04-CodeQuiz/>

Experience

May 2017 - PRESENT

City of Sacramento 4th 'R', 5151 Banfield Dr - *Rec Aid/Out of Classroom Supervisor*

- Supervised children in an afterschool program.
- Supervised other Rec Aids.
- CPR/First Aid certified.
- Tutoring

Education

August 2017 - May 2020

American River College, 4700 College Oak Dr - *AS Computer Science*

I attended American River College from 2017 -2020 to pursue a degree in computer science. I learned all there is to know about the C++ coding language, a tad bit of Python, but mainly the ins and outs of computer science : Data Structures, Basic Syntax, Loops, conditionals, Object Oriented Programming, so on and so forth.
